

MEEZA PLAYS MAJOR ROLE IN DELIVERING THE FIRST GREEN UNITED NATIONS CONFERENCE

Doha – December 1, 2008: MEEZA, the managed IT Services and Solutions provider, has played a key role in the success of the United Nations (UN) Ozone Conference held in Qatar last month. MEEZA delivered custom IT solutions and services to assist the Qatar Ministry of Environment to host a successful conference which positions Qatar at the forefront of global Ozone protection.

The UN Ozone Conference was attended by 700 delegates representing 193 countries. The delegates gathered in Qatar to chart the future of the Montreal Protocol on Substances that deplete the Ozone Layer. MEEZA was tasked by the Qatar Ministry of Environment to provide IT solutions to address the unique and challenging requirements of the Conference. A massive amount of complex documentation was required to be reviewed and many conference papers needed to be submitted. Document workflow, sharing and editing needed to meet the strict environmental protection guidelines for the conference which required a completely paperless environment.

To address these requirements, MEEZA developed a paperless conference solution which included workflow management to support a paperless environment as well as an event portal accessible by all delegates. MEEZA also provided the IT systems, networks and IT support for all 700 delegates and performed the on-site management and co-ordination of all IT requirements. The MEEZA solution resulted in the event delegates having real time access to vital information throughout the conference as well as being able to make changes to documentation and search content in real time.

Mr. Waleed Al-Emadi, Director of the International Co-operation Department for the Qatar Ministry of Environment stated “We at the Qatar Ministry of Environment are proud to have hosted the first UN paperless event here in Qatar. The event was a

complete success and the paperless IT solution and support provided by MEEZA was a key factor in this success”.

MEEZA (www.meeza.com.qa), which officially launched their services to the market at a grand launch event on November 26th, is a new privately-held joint venture that is focused on service excellence in delivering a full suite of Managed IT Services and Solutions to the market. “Our contribution to the success of the UN Ozone Conference in Qatar demonstrates how MEEZA’s unique and world-class IT skills, services and solutions will have a positive impact on businesses and governments across the region” stated Mr. Hamad Al Mannai, MEEZA Deputy CEO. MEEZA is now in discussions with the United Nations about offering their UN paperless conference solutions in other countries.
