Managed SIEM as a Services

Managed Security Services provides alerts and notifications 24 hours a day, 7 days a week for organisations that require constant security monitoring of its critical assets and infrastructure.

The service to be provided by managing Clients' SIEM (Security Information and Event Management).

By highly-trained and industry certified IT security professionals with substantial experience in Managed Security Services using industry-recognized technologies and processes.

The service delivers reports to track the progress of identified security incidents and provides trending and historical analysis of issues seen in the clients' infrastructure.

KEY FEATURES

Monitoring

- Collect, normalise and correlate log events
- Real time monitoring to detect possible threats

Analysis

- Security Professionals analyses potential issues from the collected logs of the clients' assets

Alerting

- Alert on potential security incidents and provide recommendations to resolve the security issue

Reporting

- Provide standard reports that can be tailored to meet unique client requirements

24 hour telephone and email support

- This is available for security questions and event escalation
